

Automatic exchange rates

Automatic exchange rates mean that current exchange rates are regularly loaded from a central bank and imported into MONITOR. The exchange rates are automatically updated on the registered currencies in MONITOR.

Supported banks

Automatic exchange rates in MONITOR support the following banks:

- Sveriges Riksbank
- European Central Bank
- Norges Bank*
- Danmarks Nationalbank*
- Narodowy Bank Polski
- Bank Negara Malaysia
- Monetary Authority of Singapore

* Only in MONITOR G5

Easy to Use

It is easy to use automatic exchange rates. Via scheduling, you configure on which days and at what time of day the exchange rates should be updated. You select from which central bank the rates should be loaded as well as which currencies in MONITOR should be updated.

Automatic conversion

The downloaded exchange rates will automatically be converted into the registered company currency in MONITOR.

The changes of the exchange rates for each currency are saved in a log.

New currency

When registering a new currency in MONITOR, you only have to mark the new currency in order to update the rate.

There is a built-in notification system that can be used to notify affected users if the update was not successful.
